Favour Mieye Michael

Software Engineer · Kigali, Rwanda (open to remote and relocation) · f.michael@alustudent.com · +250 796 587 152 · portfolio.froches.tech · github.com/froches2025 · linkedin.com/in/froches

Summary

Software engineer with production frontend experience as the sole frontend developer on a paid AI video editing SaaS, plus full-stack projects in React, TypeScript, Python (FastAPI) and PostgreSQL. Ships and deploys AI-powered products for African users, from a load-balanced web app on two servers to an installable PWA with push reminders and LMS integration. Available for full-time, part-time, contract and internship roles.

Experience

Frontend Engineer (Contract), Fluencer | Remote | Feb 2025 to Aug 2025

- Sole frontend developer for phase one of a subscription-based, AI-powered video editing platform, owning the Next.js App Router architecture (global auth, audio and toast providers) from first version to handover.
- Built 20+ screens and a reusable component library with TypeScript, Tailwind CSS and Radix/shadcn UI, plus login, signup, password reset and profile flows using React Hook Form and Zod validation.
- Managed client-side state with Zustand and wired Axios API services and Next.js middleware for secure, credit-based operations such as avatar training and video generation, with a WebSocket feed for live generation progress.
- Integrated WaveSurfer.js audio recording, Three.js loading animations, payments and price-tier-based access; the client extended the contract into a second phase.

Frontend Intern, HNG Internship (Cohort 11) | Remote | Jul 2024 to Sep 2024

- Finished all stages of a competitive remote internship that cuts participants each stage, shipping graded tasks on tight deadlines.

Teaching Assistant, Introduction to Python Programming, African Leadership University | Kigali | May 2026 to Aug 2026

- Co-facilitated a Python fundamentals workshop for complete beginners, owning concept explanations and live coding.

- Wrote a facilitator guide that co-facilitators used to run sessions consistently.

Projects

LifeTrack | Full-stack PWA | lifetrack.froches.tech

- Designed and built a personal productivity PWA from a written PRD: React + TypeScript frontend, Python FastAPI backend, Supabase PostgreSQL, containerised with Docker and covered by unit tests.
- Implemented Google sign-in, a Goal to Target to Task hierarchy for SMART weekly planning, hourly activity logging and mood journaling.
- Integrated the Canvas LMS API (personal access token) to sync assignments, due dates and grades, and Web Push notifications for reminders.

AidReady | AI emergency first-aid app | aidready-finder.froches.tech

- Built a voice-first emergency first-aid web app, largely solo, in one day; placed top 5 of 35 teams at the Frontiers GenAI Hackathon (ALX Kigali, powered by Google and DeepMind).
- Deployed AidReady Help Finder, an emergency facility locator, across two web servers behind an HAProxy load balancer.

CampusNav AI | Solo build, Claude Builders Club Hackathon | GitHub

- Built a multi-tenant campus navigation system using Claude Vision to read maps and A* pathfinding for routes, with a React frontend.
- Designed offline-first, low-bandwidth behaviour for campuses with unreliable connectivity.

Froches Pepper Sauce | sauce.froches.tech

- Built and launched a live brand site for a West African pepper sauce business in Aug 2026, which made its first paying sale.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, SQL
- **Frontend:** React, Next.js, Tailwind CSS, PWAs, state management, responsive UI
- **Backend:** FastAPI, Django, Node.js, REST APIs, authentication and authorization, payment integration, unit testing (pytest, Jest, Vitest)

- **Data:** PostgreSQL, Supabase, Firebase
- **DevOps:** Docker, Linux, Git and GitHub, HAProxy load balancing, multi-server deployment
- **AI:** Claude API, Claude Vision, Vertex AI, Gemini API

Education

African Leadership University, Kigali | BSc (Hons) Software Engineering | Sep 2025 to 2029 (expected)

- CGPA 4.37 / 5.0 · Mastercard Foundation Scholar

ALX Software Engineering Program | Completed

Leadership

- **Co-Lead, Claude Builders Club ALU** (Feb 2026 to present): organised a hackathon with 12 projects, 4 judges and a Demo Day, plus a Claude API key-sharing scheme so every team could build.
- **Claude Ambassador, Anthropic Ambassador Program** (Feb 2026 to present): runs weekly activations and AI fluency workshops for students.
